We are looking for Mid-level/Senior/Lead Java Engineers, working to move client facing systems to new technology stack in cloud based on microservices architecture. Solution is designed to cater for all customers across all locations in Europe and provision further expansion to new countries as a 'digital first' bank. As part of this initiative a whole new set of APIs are being developed to support new pan-European mobile app and Online Web banking experience that is dependent on new APIs.

Java API development team to create a set of APIs for client facing application to consume (Mobile, web online, chatbots, etc.):

- **Account Servicing**
- **Authentication and authorization**
- **Cards Servicing**
- **Credential Management**
- **Customer Servicing**
- **Mortgages**
- **Payment Servicing**

RESPONSIBILITIES FOR MID-LEVEL/SENIOR DEVELOPER

- **Improve and support of existing services and applications**
- **Work with onsite/customer team members, build distributed systems that integrate with a larger data and services ecosystem**
- **Desire to have full ownership of the entire SDLC from conception through build and deployment, to ongoing production operational support**
- **Work in a true Agile environment where all team members are expected to own the solution including deployment, testing, quality, monitoring and operational excellence**
- **Strive for continuous improvement of code quality and development practices**
- **Anticipate system/application challenges, present valid arguments, and propose solutions for the identified challenges or already existing problems**
- **Contribute to story sizing and work estimates for implementation, validation, delivery and documentation**
- **Review user stories to ensure a quality user experience, well-defined acceptance criteria and thorough test coverage**
- **Participate in application design and code review to ensure quality and testability of feature code**
- **Implement build, deployment and test automation to ensure high quality and enable continuous delivery**
- **Adjust positively to quickly changing priorities and shifting goals**
- **Understand, leverage and applies best practices effectively**
- **Perform other related duties as assigned may be required**

REQUIREMENTS:

- **2+ years of current professional experience working with Core Java**
- **Experience with Spring Framework**
- **Knowledge of Web services (REST)**
- **Knowledge of Continuous Integration and experience in creating/maintenance of Jenkins pipelines**

- **Experience with Elasticsearch**
- **Basic knowledge of Terraform or other IaC solution**
- **Basic Java concurrency**
- **Ability to create/document design for a feature**

WE OFFER

- **We believe that the greatest strength of the company is its people. EPAM is fully committed to help its employees to reach their full potential and achieve their professional goals through continues learning. With this in mind, we would like to introduce to you few of the many opportunities and services which we believe will help you expand your current knowledge**
- **Full access to cutting-edge tools and technologies**
- **Competitive compensation depending on experience and skills**
- **All-around Social package: professional & soft skills training, medical & family care programs, sports**
- **Relocation opportunities**
- **Free English classes**
- **Unlimited access to LinkedIn learning solutions**
- **Continuous experience exchange with experts and professionals worldwide**
- **Friendly team and comfortable working environment**
- **Engineering, corporate, and social events within and outside the Company**
- **Flexible working schedule**
- **Opportunities for self-realization**
