We are looking for a JavaScript Software Engineer to make the team even stronger. We are building a compliance and risk management application, which allows to store and track activities, systems, processes, documents or assessments relating to customer's meeting the requirements of external directives that include regulations, standards and contracts.

As a JavaScript Software Engineer, you will be involved in design and creation of a complex web application, which allows to record all the information relating to compliance and risk management.

You will be communicating with the customer and UX Designers to clarify business requirements and needs.

RESPONSIBILITIES

- Design and create a complex web application;
- Perform development from conception, user interface, and implementation;
- Be involved in a code review process;
- Do front-end work;
- Improve the UX of the current application;
- Be involved in performance improvement and bug fixing;
- Collaborate with the customer to clarify business requirements;
- Collaborate with UX Designers.

REQUIREMENTS

- Strong JavaScript experience(ES6+);
- Expert level knowledge of HTML5/CSS3;
- JS Unit testing (Karma, Jasmine, mocha, sinon, chai);
- Understanding of best-practices in designing loosely coupled and reusable UI components with clear responsibilities and encapsulated scopes;
- Strong communication skills;
- Customer-facing abilities;
- At least upper-intermediate (B2) level of English.

NICE TO HAVE

- Expertise in Polymer/LitElement, LESS/SASS, browser's web components;
- End to end testing (Protractor);

WE OFFER

- **We believe that the greatest strength of the company is its people. EPAM is fully committed to help its employees to reach their full potential and achieve their professional goals through continues learning. With this in mind, we would like to introduce to you few of the many opportunities and services which we believe will help you expand your current knowledge**
- Full access to cutting-edge tools and technologies
- Competitive compensation depending on experience and skills
- All-around Social package: professional & soft skills training, medical & family care programs, sports
- Relocation opportunities
- Free English classes
- Unlimited access to LinkedIn learning solutions
- Continuous experience exchange with experts and professionals worldwide
- Friendly team and comfortable working environment

- Engineering, corporate, and social events within and outside the Company
