

HIRING

<epam>

(REMOTE POSITIONS)

Python Developer (Mid-level, senior, lead)

Striving for excellence is in our DNA. Since 1993, we have been helping the world's leading companies imagine, design, engineer, and deliver software and digital experiences that change the world. We are more than just specialists; we are experts.

EPAM is committed to providing our global team of 43,450+ EPAMers with inspiring careers from day one. EPAMers lead with passion and honesty and think creatively. Our people are the source of our success and we value collaboration, try to always understand our customers' business, and strive for the highest standards of excellence. In today's new market conditions, [we continue to support operations for hundreds of clients](#) around the world remotely, with the vast majority of our teams working from home. No matter where you are located, you will join a dedicated, diverse community that will help you discover your fullest potential.

No less important is the safety, well-being, and experience of our applicants. Therefore, until further notice, all EPAM employment interviews will be conducted remotely. Our recruitment professionals and hiring managers are standing by to ensure a robust and engaging virtual candidate experience. We look forward to speaking with you!

JOB DESCRIPTION

We are looking for a Python Developer to help develop an application which allows to store and track activities, systems, processes, documents or assessments and meet the requirements of external directives that include regulations, standards and contracts. An application enables:

- Central system of record for all information related to compliance and risk management;
- Unified object model that represents relationships and dependencies between regulations, standards, risks, policies, org entities, people, processes, products, systems and other assets;

- Workflow for common use cases in the domain that include assessments, evidence collection and retention, compliance program management and information queries;

RESPONSIBILITIES

- Full-cycle web application development: design, implement, test, and launch solutions in Python
- Communicate with the customer to clarify requirements.
- Integration with other clients' systems and applications
- Support users of the developed system
- Drive the collaboration process with other team members

REQUIREMENTS

- Highly experienced in Python
- Highly experienced with Flask (+ Cloud Endpoints)
- Understanding of relational databases
- Knowledge of data structures and algorithms
- Knowledge of OOP and design patterns
- Understanding of software development life cycle and Agile development methodologies
- Strong ability to communicate technical concepts clearly and effectively
- Good English communication skills (B2+)

NICE TO HAVE

- Knowledge of MVC/MVP
- Experience with Unix-based OS
- Understanding of Agile testing pyramid
