(REMOTE POSITIONS)

LEAD PYTHON SOFTWARE ENGINEER

Striving for excellence is in our DNA. Since 1993, we have been helping the world's leading companies imagine, design, engineer, and deliver software and digital experiences that change the world. We are more than just specialists; we are experts.

EPAM is committed to providing our global team of 61,600+ EPAMers with inspiring careers from day one. EPAMers lead with passion and honesty and think creatively. Our people are the source of our success and we value collaboration, try to always understand our customers' business, and strive for the highest standards of excellence. In today's new market conditions, we continue to support the operations for hundreds of clients around the world remotely, with many of our teams working from home. No matter where you are located, you will join a dedicated, diverse community that will help you discover your fullest potential.

No less important is the safety, well-being, and experience of our applicants. Therefore, until further notice, all EPAM employment interviews will be conducted remotely. Our recruitment professionals and hiring managers are ready to ensure you have a robust and engaging virtual candidate experience. We look forward to speaking with you!

JOB DESCRIPTION

We are looking for Lead Python Software Engineers to join our team in Romania. Our client is one of the biggest hedge funds in the world managing investments for a wide array of institutional clients, including foreign governments and central banks, corporate and public pension funds, university endowments and charitable foundations.

RESPONSIBILITIES

- **Lead full-cycle application development: from design and concept to production**
- **Will be responsible for team of developers**
- **Design cost effective architecture for our customers**
- **Present technical solutions to product owners and be ready to argue your decisions**

REQUIREMENTS:

- **3+ years in Python development with all phases of SDLC including system analysis, design, coding, testing, debugging and documentation**
- **Computer science fundamentals (data structures, algorithms, distributed development, system design)**
- **1+ year experience with at least one cloud provider**
- **Distributed systems troubleshooting**
- **Knowledge in computer networking (understanding of VPC, access control, routing, peering)**
- **Knowledge around infrastructure as code and Terraform specifically**

NICE TO HAVE

- **Strong written and verbal communication skills (English - B1+)**
- **Stress tolerance**
- **Open-mindedness**
- **Proactiveness**
- **Ability to quickly learn new technologies**

WE OFFER

- **We believe that the greatest strength of the company is its people. EPAM is fully committed to help its employees to reach their full potential and achieve their professional goals through continuous learning. With this in mind, we would like to introduce to you few of the many opportunities and services which we believe will help you expand your current knowledge**
- **Full access to cutting-edge tools and technologies**
- **Competitive compensation depending on experience and skills**
- **All-around Social package: professional & soft skills training, medical & family care programs, sports**
- **Relocation opportunities**
- **Free English classes**
- **Unlimited access to LinkedIn learning solutions**
- **Continuous experience exchange with experts and professionals worldwide**

- **Friendly team and comfortable working environment**
- **Engineering, corporate, and social events within and outside the Company**
- **Flexible working schedule**
- **Opportunities for self-realization**
