Victor Dvorkin is the Chief Delivery Officer & EVP Americas, at EPAM, where he leads the global delivery organization of over 55,000, and oversees every aspect of AI-native engineering engagement and delivery across the U.S., Canada, Europe, Latin America, and India.

In his dual role, he is responsible for global delivery standards and assurance while bridging EPAM's Americas AI-native strategy, accelerators and talent across the full client lifecycle – from engagement design and presales to execution and managed services.

Mr. Dvorkin joined EPAM in 1997 and has since been instrumental in driving the Company's growth in emerging industries, technologies and solution practices. He previously served as an SVP and the Head of Global Engineering, Cloud & Platforms where he led EPAM's advanced engineering, cloud, enterprise platforms and global delivery centers across the Americas, EMEA, CIS and APAC. Under his leadership, EPAM's

team of IT and engineering professionals has helped global clients solve their most complex digital transformation and technology modernization challenges.

Having worked and lived in the U.S. and Eastern Europe, Mr. Dvorkin has an extensive understanding of global delivery models and brings hands-on technology experience to his role. He also has expertise in the travel, healthcare, insurance and oil & gas industries.

Mr. Dvorkin holds a master's degree in applied mathematics from the Belarusian National Technical University and a Ph.D. in Information Technology from the International IT Academy in Minsk, Belarus.
