

BUILDING BETTER BI & ANALYTICS SOLUTIONS WITH SAP TECHNOLOGIES

CELEBRATING TWO DECADES OF SAP INNOVATION

For nearly 20 years, EPAM's SAP experts have enabled businesses to quickly understand their data and make informed decisions. We've turned our attention to key areas like budgeting and financial forecasting as we continue to use SAP technologies to improve reporting accuracy and accountability. Through our deep SAP expertise, EPAM delivers our client's vision as it relates to customer expectations, business growth, and cost management.

EPAM IMPLEMENTS BI FOR GREATER EFFICIENCY

Our ability to take the most complete, functionally rich business intelligence products from SAP and customize them for our clients results in reliable, high-quality solutions that help businesses achieve their goals faster. We do this by:

- Leveraging our expertise with SAP Enterprise Data Warehouse, SAP Business Objects, SAP HANA, and SAP Business Warehouse
- Extending SAP's BI platform to include Lumira, Explorer, Crystal Reports, Dashboards, and Predictive Analytics
- Providing Enterprise Performance Management, Integrated Planning, Business Planning, Consolidation, Profitability, and Cost Management
- Supporting Agile development and continuous delivery

We offer an authoritative approach to BI & Analytics that is cloud-enabled, integrated, and aligned with large-scale business goals, enabling our clients to enjoy real-time access to their key insights. With more than 45 successful SAP BI & Analytics projects completed for over 35 satisfied clients, we know what it takes to provide businesses with the intelligence they need to thrive in the digital age.
