

EPAM DIAL for Education

Seamlessly Integrating GenAI to Transform Learning & Institutional Efficiency

Generative AI (GenAI) has the power to transform how educational institutions operate. Personalized learning journeys, automated administrative processes and streamlined workflows are just a few ways GenAI can help schools and universities deliver better results.

To fully embrace these opportunities while overcoming challenges like data security and system integration, institutions need tools that are flexible, scalable and secure.

EPAM's award-winning DIAL Orchestration Platform enables education providers to integrate GenAI into their existing workflows, empowering them to innovate and deliver transformative experiences confidently and quickly.

What DIAL Offers

EPAM's DIAL Orchestration Platform functions as a unified access point that combines public and private large language models (LLMs) with traditional data sources. When customized for education, DIAL provides institutions with secure, intuitive tools that integrate into current systems, accelerating AI adoption without disrupting operations.

Importantly, DIAL is **open source** and available under a **permissive license**, making it especially well-suited for educational institutions, EdTech platforms and upskilling providers looking for flexible, low-barrier AI adoption.

DIAL for Education: Features & Benefits

MITIGATE RISKS & ACCELERATE

Safely explore GenAI solutions with DIAL to shorten implementation timelines and reduce risks. Whether for curriculum design, student engagement or administrative workflows, DIAL delivers reliable results at scale.

SECURE & CONTROL

Protect sensitive student records, educational data and proprietary research with robust security features. EPAM can deploy DIAL securely for your institution or train your team to manage adoption confidently.

INTEGRATE & CUSTOMIZE

DIAL is fully open source and can be adapted to meet the unique needs of educational institutions. It integrates seamlessly into your workflows, offering flexibility and customization for administrators and educators.

FLEXIBLE & FAST

DIAL's user-first design ensures rapid deployment and effortless integration into existing systems, reducing time-to-value and minimizing disruption.

Key Challenges in Education

Educational institutions face increasing pressure to modernize teaching methods, streamline administrative operations and provide personalized learning opportunities, all while remaining cost-effective. As student needs become more complex, institutions require innovative yet scalable solutions to stay ahead of demands.

EPAM's Approach

DIAL leverages GenAI to help educational institutions enhance efficiency, personalize learning and provide actionable insights. Its secure and flexible platform empowers organizations to address today's challenges and scale innovation for the future.

With DIAL, educational institutions can:

- **Streamline operations** across learning management systems, faculty portals and administrative tools.
- **Use conversational AI** to deliver personalized learning tailored to student progress.
- **Drive data-informed decisions** for curriculum planning and resource allocation.
- **Accelerate innovation** with AI-powered grading, adaptive content creation and advanced analytics.
- **Provide AI-powered solutions** to universities and companies to personalize offerings for students.
- **Leverage AI** to gain insights from businesses on evolving skills, profiles and qualifications in demand from the labor market.
