

Learn-From-Home Services for Educational Companies

TRANSFORM REMOTE LEARNING INTO QUALITY ONLINE EDUCATION

Most educational institutions around the world have been forced to switch to remote learning, ushering in changes that will continuously transform education. This calls for not only transferring traditional learning online but, rather, creating a new educational ecosystem that is specifically designed for digital delivery.

Through our strategy consulting, learning experience design, educational content and technology expertise, EPAM ensures that your business is equipped to quickly and effectively respond to the current environment, while also seizing the opportunity to future-proof your organization and enhance your market position.

EPAM offers a set of services, accelerators and strategic solutions for educational publishers, professional training providers, educational content and technology providers, and educational institutions to address the market need for delivering quality online education directly to people's homes.

How EPAM Can Help You Transition to the “New Normal”

TRANSFORMATION TO DIGITAL-FIRST & DIRECT-TO-CONSUMER BUSINESS MODELS

Discover, ideate, define and design new business models with EPAM’s strategy consulting services. Our consultants can help you solve your pain points by implementing new models that help you transform to a digital-first organization.

LEARNING EXPERIENCES DESIGNED TO BE DELIVERED ONLINE

Ensure all end users are receiving a high-quality digital experience through our learner-centric design approach, learner journey mapping and CX/UX expertise.

ENGAGING & ADAPTIVE EDUCATIONAL CONTENT

Optimize your transition to quality online education. We can help you automate your content migration and conversion for existing assets or provide full-scale development through EPAM’s learning content services.

ROBUST LEARNING PLATFORMS & EDUCATION TECHNOLOGY SERVICES

Enrich your existing learning systems with EPAM’s EdTech services, which include integration, customization, interoperability, scalability and automated load testing. Additionally, we can engineer new robust learning solutions for your business.

ACCESSIBILITY IMPLEMENTATION FOR EQUAL LEARNING OPPORTUNITIES

Guarantee your learning solutions are compliant with accessibility regulations and equitably serve all users with quality programs. EPAM designs content, solutions, platforms and tools with accessibility in mind.

DIGITAL ADOPTION SOLUTIONS TO MAKE LEARNING EASIER

Help both students and teachers learn new technologies quickly. Beyond initial training modules, EPAM’s digital adoption solutions include accelerators that offer just-in-time training to ensure new technology can be adopted without compromising engagement and efficiency.

VIRTUAL COMMUNICATION SOLUTIONS THAT ARE SECURE & TAILORED TO eLEARNING

Overcome the security challenges of videoconferencing technologies with EPAM’s real-time communication solution. Using end-to-end encryption and meeting flow controls, we help you ensure secure communication channels and prevent outside interruptions. The solution can be further customized with widgets and collaboration tools tailored to eLearning – all seamlessly embedded into the client’s platform without the need to install third-party applications.

Key Benefits of EPAM's Learn-From-Home Services

STRATEGIC APPROACH

Remote learning is here to stay. We provide not just a quick response to the current crisis, but a partnership to build innovative, quality digital education. Your transformation to a digital-first, direct-to-consumer model will help ensure a leading market position.

SPEED & SCALE

Our numerous accelerators and frameworks enable you to quickly scale your educational infrastructure and digital content development and speed time-to-market.

QUALITY

EPAM's combination of engineering excellence and subject-matter expertise ensures the highest quality of our educational solutions.

ENGAGEMENT

Our learner-centric instructional design approach helps you drive student engagement and measurable success.

THE NEW HYBRID MODEL

We leverage remote, onsite, nearshore, offshore or any combination of delivery models based on the types of activities and skill sets required, as well as your unique requirements.
