WHAT WE OFFER

TECHNOLOGY CONSULTING SERVICES

We work with your team to provide a strategy and roadmap to fulfill your vision while harnessing the full power and potential of GCP.

IT PORTFOLIO DIGITAL TRANSFORMATION

We engineer, re-engineer and augment your portfolio, using open architecture and standards built to run optimally on GCP while following Google-recommended best practices.

DIGITAL CUSTOMER EXPERIENCE

We engineer solutions to support your digital user's journey and experience with expertise in Google's platforms such as Firebase, Google Application Engine and other platforms.

HYBRID CLOUD AUGMENTATION

We augment your existing on-prem and cloud footprint with GCP solutions.

BIG DATA

We specialize in data strategy and consulting, predictive modeling, algorithm development, data mining, large-scale solutions design, optimization and testing using powerful GCP solutions such as BigQuery, Dataproc (Data Lake, Hadoop), Datalab and Data Studio.

API TRANSFORMATION

We maximize your application's capabilities with Google Apigee, the cross-cloud API platform that enables integration, consumerization and legacy modernization. We provide services from API strategy to API program operation, API development and API platform customization.

Explore our Related Google Partnerships & Offerings

EPAM + GOOGLE APIGEE

As a Google Apigee Consulting Partner, EPAM delivers cross-cloud API platform expertise to accelerate the pace of digital business for our customers. Leveraging the collective experience of our 40+ Apigee-trained developers and architects across 25+ successful customer engagements, you can gain control and visibility into the APIs that connect applications and data across the enterprise and across clouds.

ADVANCED SOLUTIONS LAB

As one of only a few Google Advanced Solutions Lab (ASL) System Integrator Partners, EPAM helps its customers accelerate Google-built machine learning solutions to overcome business challenges. We offer services throughout the machine learning lifecycle, from data preparation and model integration to application development, project planning and change management.

MACHINE LEARNING SERVICES

As a Google Cloud Machine Learning Services Partner, we use GCP products such as TensorFlow and SciKit with IoT data capture and ingestion using IoT Core Services. Depending on the industry and use case, our customers can choose a preferred development path where EPAM can help in every stage of the process.

G SUITE

With Google App Maker, developers can create and deploy applications in days, which makes the platform appealing to businesses using G Suite for their infrastructure. EPAM has over fifty projects across various business areas that work with this platform.

SAP WORKLOAD MIGRATION

Leveraging our strategic partnership with SAP, EPAM's cloud experts can virtualize your SAP technologies and help you innovate your enterprise, protect your data and empower your organization.

MOVE YOUR BUSINESS FORWARD WITH EPAM + GOOGLE

Need an expert to help you build and host applications and websites, store and analyze data, and develop machine learning solutions on Google's scalable infrastructure? Contact us today to start the conversation.
