

Sitecore® OrderCloud Migration Accelerator

Accelerate and simplify your transition from Sitecore Experience Commerce to OrderCloud with this flexible solution

EPAM's OrderCloud Migration Accelerator helps you fast-track your commerce project by providing a predefined solution for marketplace provisioning and data migration. Explore the value of our Sitecore OrderCloud Migration Accelerator:

- Enables you to migrate to OrderCloud rapidly
- Provides a prebuilt framework for catalog (including categories, products, variants, specifications and prices), users and orders
- Integrates into your existing source provider
- Enables you to leverage prebuilt data models, integrations and processing to configure and execute data migration
- Offers extensible source code so you can tailor your source and destination to your requirements
- Migrates commerce entities from Sitecore Experience Commerce (XC) to Sitecore OrderCloud seamlessly
- Establishing the initial marketplace with setup for security profiles, clients, buyers and locales
- Allows your team to automate the synchronization of transactional order and user data for seamless cut over
