

Five Benefits of Acquia Site Studio

Acquia

Building, maintaining and optimizing multi-site experiences at the speed and scale necessary to meet customer demand is a significant challenge for enterprise organizations. This effort requires a lot of time, money and highly-skilled technical resources. To overcome these challenges, organizations are turning to solutions like Acquia Site Studio (formerly Cohesion), a powerful, low-code solution for creating and editing enterprise-grade Drupal sites.

As an Acquia Global Partner and an early adopter of Acquia Site Studio, EPAM is uniquely positioned to help your organization realize the benefits of Site Studio.

1

Accelerate Time-to-Market

Leverage a user-friendly interface with drag and drop components to allow marketers to build and launch digital experiences up to **four times faster** than with traditional content solutions.

2

Scale at Speed

Meet the expectations of today's consumers by creating the volume of sites needed to reach your target audience across applications and geographies with flexible templates and reusable components.

3

Consolidate Content

Provide marketers with all the tools necessary to easily design and build pages while authoring content in one centralized location, without the need for external services.

4

Improve Governance & Compliance

Empower your content marketing team with site-building independence via a library of pre-approved reusable components and design elements, ensuring enterprise-wide brand consistency.

5

Propel IT Innovation

Free up IT resources to focus on high-value projects, like functional enhancements, instead of spending time on repetitive, labor-consuming tasks.
